HIGHLIGHTS OF QUALIFICATIONS

Product designer and developer with experience building AI-powered products and accessible digital experiences. Combines UI/UX design, front-end development, and a background in Fine Arts, Computer Science, and Psychology to create intuitive, user-centred products.

SKILLS

Product Design: UI/UX Design, Wireframing, Prototyping, User Research, Accessibility

Design Tools: Figma, Framer, Photoshop, Illustrator, InDesign, After Effects, TouchDesigner

Development: JavaScript, React.js, HTML, CSS, Python, p5.js, ml5.js, C++

Tools & Platforms: GitHub, AWS, REST APIs, Agile Workflows

EXPERIENCE

Product and UX Intern — Alectify, Richmond Hill, ON, *Apr 2026 – Present*

- Redesigned **40+** website pages and strengthened product messaging, contributing to the acquisition of **2 new clients**.
- Collaborated with developers to improve UI consistency and accessibility across AI-powered products.
- Created **15+ tutorial videos** to simplify onboarding and help customers navigate key product features.

Front-End Web Developer — MYE Health, San Francisco, CA, *May 2025 – Jan 2026*

- Developed responsive React interfaces that transformed complex eye-tracking and brain-health data into accessible visualizations.
- Optimized AWS-backed data pipelines for live concussion severity scores, reducing data latency by **40%** and enabling faster access to assessment results.

Web / Software Developer — PinkByte, Concord, ON, *Sep 2025 – Dec 2025*

- Built full-stack React applications replacing manual internal workflows for **100+ server records**, improving operational efficiency.
- Optimized API requests and component rendering, reducing application load times by **35%** and improving responsiveness for daily users.

PROJECTS

Co-Connect | 2nd Place — UW Design Jam with Co-operators, 2025

- Co-designed and developed a personalized insurance referral experience, using advisor matching and referral incentives to build customer trust and encourage referrals.

Somnia, Dream Visualizer — CS 383, University of Waterloo, *2026*

- Built a generative data visualization tool using p5.js and ml5.js to translate sleep and emotional data into interactive abstract graphics
- Applied machine learning and procedural generation to create visual experiences from user data

Alt-Verse: Interactive Installation — FINE 247, University of Waterloo, *2025*

- Created an immersive interactive artwork exploring alternate realities and digital ecosystems using TouchDesigner.
- Exhibited the experience at THEMUSEUM as part of the Alt-Verse exhibition

Habitat | 1st Place — UW/UX Design Sprint, 2025

- Designed a gamified mobile daily-life organizer using interactive features to encourage consistent habits and healthier routines.

Lurn | Best Design Award — UW/UX Designathon, University of Waterloo, 2025

- Mobile learning experience designed to help children complete homework while encouraging creativity, exploration, and interaction with others.

EDUCATION

Bachelor of Arts in Fine Arts, Digital Arts Specialization — University of Waterloo, *Sep 2023 – Apr 2028*

Minors: Computer Science, Psychology

Relevant Coursework: Digital Imaging, Computer Programming, Media Interaction
